

**PURPOSE OF CONSENT**

To evaluate your insurability, the Insurer named above (the "Insurer") has requested that you provide a blood, urine, or oral or other bodily fluid sample for HIV testing (the "HIV test" or "test"). The HIV test may include, but is not necessarily limited to, testing for the presence of Human Immunodeficiency Virus (HIV) antibodies/antigens. By signing this form, you agree that the test may be done, that the test results may be disclosed as described in this form, and that underwriting and/or coverage decisions will be based on the test results. As a result, it is important that you carefully read this HIV Testing Notice and Informed Consent Form prior to consenting to such a test and disclosure.

**INFORMATION ABOUT AIDS**

Acquired Immunodeficiency Syndrome (AIDS) is a life-threatening disorder of the immune system caused by a virus, HIV. The virus is transmitted by sexual contact with an infected person, from an infected mother to her newborn infant, or by exposure to infected blood (as in needle sharing during injection drug use). Persons at high risk of contracting AIDS include males who have had sexual contact with another man, intravenous drug users, hemophiliacs, and persons who have had sexual contact with any of these persons. AIDS does not typically develop until a person has been infected with HIV for several years. A person may remain free of symptoms for years after becoming infected. Infected persons have a 25 percent to 50 percent chance of developing AIDS over the next 10 years.

**THE HIV TEST**

Before consenting to testing, please read the following important information:

1. **Purpose.** The purpose of this HIV test is to determine insurability. This test is being performed to determine whether you may have been infected with HIV. If you are infected, you are probably not insurable. This test is not a test for AIDS; AIDS can only be diagnosed by medical evaluation.
2. **Positive Test Results.** If you test positive, it does not mean that you have AIDS, but that you may be at significantly increased risk of developing problems with your immune system. If you test positive, you should consult with your personal physician, a public health clinic or an AIDS information organization to gain more information on the medical implications of a positive test result.
3. **Accuracy.** An HIV antibody/antigen test is reliable, but not 100% accurate. It is possible, but rare, that an HIV antibody/antigen test may provide a positive result even if you are not infected. In this case, retesting should be done to confirm the validity of a positive test. It is also possible that an HIV antibody/antigen test may provide a negative result, even though you are infected. This happens most commonly in recently infected persons; it takes at least 4-12 weeks for a positive test result to develop after a person is infected.
4. **Side Effects.** A positive test result may cause you significant anxiety. A positive test may result in uninsurability for life, health, or disability insurance policies you may apply for in the future. Although prohibited by law, discrimination in housing, employment, or public accommodations may result if your test results were to become known to others. A negative result may create a false sense of security.
5. **Confidentiality.** All test results will be treated confidentially. However, in signing this Notice and Informed consent Form, you authorize the testing laboratory to report the test results to the Insurer. The Insurer will treat the test results as confidential, but your test results may be provided to affiliates, reinsurers, employees and contractors of the Insurer who are involved in handling or determining your application for coverage or claims. A positive or indeterminate test result may be reported to the Medical Information Bureau, Inc. (MIB), which is a national insurance data bank. The report will use a generic code to report a non-specific blood disorder.
6. **Disclosure of Results.** Under Nebraska law, you are to be informed of the HIV test results and if the result is positive, you will be referred for post-test counseling. If your HIV test results are negative, notification will be sent to you. If the HIV test results are positive or indeterminate, the Insurer will contact the physician designated in this HIV Testing Notice and Informed Consent Form. The Insurer will also disclose a positive or indeterminate HIV test result to you.
7. **Prevention.** Persons who have a history of high risk behavior should change these behaviors to prevent getting or giving AIDS, regardless of whether they are tested. Specific important changes in behavior include safe sex practices (including condom use for sexual contact with someone other than a long-term monogamous partner) and not sharing needles.

8. **Information.** Further information about HIV testing and AIDS can be obtained by contacting your personal physician, the State Department of Health, as well as any AIDS information organizations in your area.

**CONSENT**

I hereby acknowledge that I have received, read and understand the HIV Testing Notice and Informed Consent Form.

I understand that the results of the HIV test will be used in determining insurability.

I authorize the testing laboratory to disclose the results of the HIV test to the Insurer.

I authorize the Insurer to disclose the HIV test result to its reinsurers, affiliates, employees and contractors involved in making an underwriting or coverage determination regarding my application or claim and to whom such disclosure is necessary.

I understand that under Nebraska law, I have the right to be informed of the HIV test results, and if the results are positive, I will be referred for post-test counseling. If my HIV test results are negative, notification will be sent to me. If the HIV test results are positive or indeterminate, the Insurer will contact the physician designated in this Notice and Informed Consent Form. The Insurer will also disclose a positive or indeterminate HIV test result to me.

I authorize the Insurer to disclose a positive or indeterminate test result to the physician named below. I understand that any such disclosure will be in a manner that assumes confidentiality.

Physician: \_\_\_\_\_

Address: \_\_\_\_\_

City, State, Zip: \_\_\_\_\_

I authorize the Insurer to report a positive or indeterminate HIV test result to the Medical Information Bureau, Inc. I understand that any such report will use a generic code to report a non-specific blood disorder.

I voluntarily consent to the collection of a sample of blood, urine or oral tissue, or other bodily fluid from me, the testing of the sample(s), and the disclosure of the test results as described above.

A photocopy will be as valid as the original.
